## Paper / Subject Code: 50604 / Cell Biology 1T00423 - S.E.(BIOTECHNOLOGY)(Sem III) (Choice Based) / 50604 - CELL BIOLOGY

Q.P. Code: 21387

|      | (3 Hours)   | Total Marks: 80 |
|------|---|-----------------|
| NB:  | <ul> <li>(1) Question No.1 is compulsory</li> <li>(2) Attempt any 3 questions from remaining Q2 to Q6</li> <li>(3) Each question is of 20 marks</li> <li>(4) Figures to right indicates full marks</li> </ul> |                 |
| Q.1- | a) Explain in detail about the different stages of meiosis  | 10              |
|      | b)Explain in detail about different types of Passive transport  | 10              |
| Q.2  | Write Short Notes for the following. (Any 4) a) Virus b) Cyclins c) Intermediate filaments d) Lysosomes e) Hemidesmosomes   | 20              |
| Q.3  | Explain the following with a neat diagram  a)Motor proteins b)Adherens junction c) Animal Cell d)Ion pumps  | 20              |
| Q.4  | <ul><li>a) Discus in detail overview of cellular signalling pathway.</li><li>b) Compare SER and RER</li></ul>   | 10<br>10        |
| O.5  | a) Explain the role of adhesion molecules in cell adhesion  | 10              |
|      | b) Explain in detail about Gap Junctions  | 10              |
| Q.6  | a) Explain in detail about Microtubules.  | 10              |
| 7    | b) Explain the structure and function of Golgi bodies   | 10              |
