

MANTHAN HACKATHON 2021

❖ Organized By

ABOUT MANTHAN

Ministry of Education's innovation cell, AICTE along with BPR&D decided to conduct Manthan hackathon in very short of time considering dynamically changing technology stack in national security domain. As stated by Hon'ble Prime minister that hackathon's are the innovative way to solve problems faced by ministries and govt departments. Manthan is a hackathon based on national interests and challenges faced by our intelligence agencies that will be conducted online(Virtual). Virtual Hackathon basically refers to conducting an entire event online on a cloud based tool for non-stop 36 hours coding concept derived from Smart India Hackathon that engages all user types under one web console with different nodes.

Similar to the physical event apart from the physical presence the virtual mode will emulate most functionalities and some even better. In order to conduct Manthan 2021 AICTE-MIC will follow the same procedure that we followed in Smart India Hackathon 2020 Software Edition.
